

316 Stainless Steel Deck Filler

POWER MARINE is 316 Stainless Steel Deck Filler manufacturer and supplier in China who can wholesale 316 Stainless Steel Deck Filler. We can provide professional service and better price for you. If you interested in 316 Stainless Steel Deck Filler, please contact with us. We

follow the quality of rest assured that the price of conscience, dedicated service. We have been specialized in marine hardware for more than 25 years. Our product is made of 316 stainless steel, which has good corrosion resistance. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

316 Stainless Steel Deck Filler

Product Introduction

As the professional manufacturer, POWER MARINE would like to provide you high quality 316 Stainless Steel Deck Filler. And we will offer you the best after-sale service and timely delivery. We follow the quality of rest assured that the price of conscience, dedicated service. 316 Stainless Steel Deck Filler has a longer service life in seawater, ultraviolet light and humid environments. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

Product Parameter (Specification)

Product name	316 Stainless Steel Deck Filler
Specification available	Multiple sizes
Standards that follow to	ISO 9001, CE, TUV, CSS, SGS.
Samples available	Yes.

Shandong Power Industry and Trade Co., Ltd.

Address: Chengyang District, Qingdao, Shandong Province, China

Tel: [+86-15865772126](tel:+86-15865772126)

E-mail: andy@hardwaremarine.com

Packing method	Bubble bag+Wooden carton
Production lead time	10-15 days for a 20ft container, 20-25 days for a 40ft container.
Warranty time	Support returns and exchanges
Payment term	T/T
FOB loading port	Qingdao China

Code	D mm	H mm	Model
PM1038A-FUEL	38	80	FUEL
PM1050A-FUEL	50	80	FUEL
PM1138A-DIESEL	38	80	DIESEL
PM1150A-DIESEL	50	80	DIESEL
PM1238A-WASTE	38	80	WASTE
PM1250A-WASTE	50	80	WASTE
PM1338A-GAS	38	80	GAS
PM1350A-GAS	50	80	GAS
PM1438A-WATER	38	80	WATER
PM1450A-WATER	50	80	WATER

Product Feature And Application

The history of 316 Stainless Steel Deck Filler can be traced back to the development of stainless steel as a material. Stainless steel was invented in the early 20th century by British metallurgist Harry Brearley, who discovered that adding chromium to steel improved its corrosion resistance. In the 1920s, stainless steel began to be used in various industries, including the marine industry. Stainless steel's rust- and corrosion-resistant properties make it an ideal material for marine components and equipment. 316 Stainless Steel Deck Filler is quickly becoming a popular choice due to its durability, longevity, and ability to withstand the harsh conditions of the marine environment. Over the years, advances in manufacturing technology and stainless steel alloys have further improved the performance and design of deck fillers. Modern 316 Stainless Steel Deck Fillers are designed for maximum strength, corrosion resistance and ease of use. In recent years, environmental protection practices in the marine industry have also received increasing attention. 316 Stainless Steel Deck Filler are often manufactured using recycled materials or have recyclable components, making them a more sustainable option for boat owners and manufacturers. Today, 316 Stainless Steel Deck Filler continues to be widely used in the marine industry, providing reliable and efficient solutions for fuel, water and waste systems on ships of all sizes.

Product Details

316 Stainless Steel Deck Filler is an important component of a ship's fuel, water or waste system. They offer a variety of features that make them highly reliable and practical. Here are some common characteristics of Stainless Steel Deck Filler:

Corrosion Resistance: Stainless steel is known for its excellent corrosion resistance, making it an ideal material for deck filler. It can withstand salt water, chemicals and other harsh marine conditions.

Polished Surface: 316 Stainless Steel Deck Filler often have a polished surface, which not only enhances their appearance but also makes them easier to clean and maintain.

Lockable Design: Many 316 Stainless Steel Deck Filler have a lockable design. This feature secures fuel, water or waste systems and prevents

unauthorized access or tampering.

Dual Key Control: Some deck tankers have a dual key control system where two different keys are required to unlock and open the fuel filler cap. This provides an extra layer of security and prevents accidental opening.

Ventilation System: Deck fillers for fuel systems often include a built-in ventilation system. This allows air to escape from the tank during refueling while preventing fuel from spilling or excessive pressure.

Labeling or identification: 316 Stainless Steel Deck Filler often have clear labels or identification markings to indicate the type of system they are connected to, such as water, fuel or waste. This helps the boat owner or operator easily identify and obtain the correct fill for their needs.

Drainage Channels: Some deck infills are designed with drainage channels, ensuring that any water or spillage on the deck is directed away from the opening. This feature helps prevent contamination of the fuel or water system.

Multiple Sizes and Accessories: 316 Stainless Steel Deck Filler are available in a variety of sizes and configurations to accommodate different tank sizes and connection requirements. They may have different thread types such as BSP (British Standard Pipe) or NPT (National Pipe Thread) fittings to ensure compatibility with existing systems.

Overall, 316 Stainless Steel Deck Filler combines durability, corrosion resistance, safety and functionality to ensure the safe and efficient operation of ships and fuel, water or waste systems onboard them.

Loading & Shipment

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
